 To whom it may concern, hopefully all of you.

I'm writing to request that the commission not approve RMP's proposed changes to their net metering tariff until interested parties and stakeholders have had time and opportunity to evaluate the changes. I myself have JUST completed a high profile net metering home with a 2100W photovoltaic system, with the anticipation that policy will change for the better. Not for the worse. The Wasatch Journal is doing a profile on this home, and I will be sure to update my interview profile before the October issue goes to print to reflect my disconcert if our voices are not heard.

Thanks for listening  
 Thomas Laakso
